Our BA/BS programs prepare students for positions as technical writers/editors, content developers, or UX professionals, most commonly working on teams to create user guides, web content & proposals in companies within the information technology, consulting & healthcare industries. Students earning the BS will be especially well-qualified for technology-heavy positions (e.g., front-end web developer, business analyst, etc.) in information technology and software companies.

DEPARTMENT OF TECHNICAL COMMUNICATION

BA/BS PROGRAMS

For more information, contact Dr. Erin Friess at Erin.Friess@unt.edu

techn.com.unt.edu

We offer various leadership opportunities through TA & Lab Tutor positions as well as involvement in our student org, Eagle Technical Communicators.

Our courses cover the principles of technical communication: technical writing, editing & content strategy; document/web design; communication/information technologies & web development that all equip you with cutting-edge knowledge & skills that are immediately applicable to industry.
